

STAKEHOLDER MANAGEMENT PLAN

Name	About the Stakeholder	Plan
Prairie Robotics	Local organisation working closely with the City of Regina, as well as other municipalities to improve efficiency and effectiveness of recycling.	Meet with the team and provide updates on a weekly sprint basis. Schedule additional meetings as needed to gather further information or ask questions for guidance.
Mitacs	Non-profit organisation which funds research and development. They provide funding in order to connect academia and industry to encourage innovation.	Initial project proposal approval and discussion. Mitacs will be updated if necessary. Finally, submit a final report which includes our research.
Dr. Mohamed El-Darieby	Primary mentor for this project who will provide guidance for our project research and information on technology being used.	Meeting and providing updates on a bi-weekly basis. Provide further frequent updates as needed on progress being made towards the project.
Dr. Tim Maciag	Project Supervisor to ensure academic project requirements are being met.	Attend bi-weekly scrum meetings where each member elaborates on contributions towards the project goals. A plan for each following scrum is also established to ensure continuous progress.
Dr. Trevor Douglas	Primary mentor for this project who will provide guidance for our project research and information on technology being used.	Meeting and providing updates on a bi-weekly basis. Provide further frequent updates as needed on progress being made towards the project.
George Daoud	Dr. El-Darieby's Ph.D. student who has experience in the technology being used within the project.	Progress updates will be made on a bi-weekly basis. Additional meetings will be scheduled if technological concerns occur, and guidance is required.
