PROJECT DOCUMENTATION GUIDELINES

Copy-Waste

Storage Location and Organization

Documents are stored in our core GitHub repository in our [Documentation folder](#). This folder is further divided into subfolders for documentation with shared themes/topics such as Planning or Scheduling.

Naming Conventions

- Folders added to the directory which do not share the existing themes
- Documentation file names follow the title they were given in the provided Documentation Template folder in ENSE 400/477.

Document Versions

- All documents which exist in folders 0 to 7 were reviewed and updated on Feb. 26, 2022 to incorporate any new changes which occurred since the project's initialization
