Team Meeting

March 7, 2021 / 4:00 PM / Zoom

Attendees

Nolan Flegel, Rishabh Prasad, William Peers, Sam Dietrich

Agenda

- Scale up dataset / Training
- Next features / flags
- Connecting to S3

Notes

- Pull Requests for pipeline modules happening this week
- Testing complete pipeline and looking to produce dataset by end of week
- Start with 10 original images and 10 artificial images, produce 1 to 1 dataset
- Focus on producing a basic dataset before adding any additional features
- In person Bazaar this week, setting up demos of dashboard, bin tip and sample augmented images
- Setup logging for rejected images
- Tested: Polygon conversion, Polygon clipping, Image export, Annotation Export
- Refactoring completed, waiting on other Pull Requests to be merged
- Audit Yard Waste: Categorize -> Branches, Soil, Leaves, Grass or combined.

Action Items

1. Audit Yard Waste
2. Finish Testing Pipeline and Produce first Dataset
3. Code Refactor + Code Review

Next Meeting Agenda (Mar 14, 9:30 am)

1. Scale up dataset / Training
2. Generate performance metrics
3. Dashboard updates
